

ENESKAsonic Ultrasonic Polisher

High Efficiency · Leading Edge · Latest Generation for Finest Stock Removal

The most innovative advancement in the field of ultrasonic polishing, the ENESKAsonic Ultrasonic system is characterized by consistent advancements in every respect, with a sophisticated design and convenient high-tech engineering.

The ENESKAsonic is used for polishing and lapping in the frequency range of 20 and 30 kHz. The **Auto Tune** function determines the optimum frequency and the adjustable power control is suitable for fine, delicate work on narrow ribs and edges. Use the **Boost Mode** feature for power-intensive, extra abrasive work with sintered diamond files. The LED-assisted display shows the widest range of operating parameters and settings. The 140g lightweight handpiece with an M6 fine thread is comfortable to hold and enables fatigue-free work.

PRODUCT FEATURES

- **Intuitive touch operation combined with a rotary controller on high-quality glass**
- **Modern LED-assisted multifunctional display**
- **Boost function for applications requiring greater power**
- **Idle timer detects unused handpieces and protects against wear**
- **USB charging connection enables optional workplace light without another power source**
- **Compatible with NSK SHEENUS neo handpiece when used with NSK Handpiece Connect Cable**
- **Made in Germany**

ENESKAsonic Ultrasonic Polisher Set
Item # 0012000-US1 - LIST Price - \$4,250.00
(1) Control Unit
(1) Ultrasonic Handpiece
(1) Handpiece Support Stand
(1) Screen Protector made of tempered glass
(1) Power Cord
(2) 4 A Fuse for 110V use
(1) Allen Key and (2) Chuck Key
(1) 3mm round tool holder
(1) 1mm flat tool holder
