

Falcon Tool's Die Makers & Silversmith Rifflers are heavier double-ended files designed for removing metal and smoothing in tight places and hard-to-reach areas. Teeth are cut on small areas at the ends of each file leaving a long middle portion as a handle. Overall length is 7". Available in cuts 0 and 2.

Originally used and hand forged by die sinkers, die makers, silversmiths, etc., in shapes and cross-sections appropriate to their work, Riffler Files are great for hard-to-reach surfaces and for detail finishing on molds, castings, and engravings.
